

After Sun Care

Arabica Coffee berry provides the most powerful natural antioxidants and for that reason it contains polyphenols* and phenolic acids in high levels. Here are some of the benefits of using coffee berry for your face skin care and to enhance your beauty.

Helps in minimizing collagen damage

The use of berry is important in preventing wrinkles and other facial skin and general skin damages that could potentially be caused by the sun rays.

Treat inflammatory photo-damage

The coffee berries polyphenols* may work as a topical anti-inflammatory on your skin. and for that reason, the coffee berry can help in preventing and treating the various inflammatory skin issues.

Smooth skin texture

Coffee berry, when applied on the skin, has been shown to help in the restoration of the face skin moisture and elasticity.
